

ADAM BIN ARBAIN

Kerinci, Kuala Lumpur | adamarbain2107@gmail.com | +60104587140
<https://www.linkedin.com/in/adam-arbain/> | <https://www.adamarbain.dev/>

Software Engineer with proven full-stack development expertise across enterprise ERP systems and AI-powered public health solutions. Delivered measurable impact at Forthify Technologies through Next.js migration achieving 20% faster page loads, and built production-grade applications using React, Vue.js, Node.js, and Python. Graduating from Universiti Malaya (CGPA 3.57) with hands-on experience in AWS cloud services, modern frontend frameworks, and agile development practices—ready to contribute to scalable software solutions from day one.

EDUCATION

Universiti Malaya | Kuala Lumpur

October 2022 – February 2026

Bachelor of Computer Science (Software Engineering)

- CGPA: 3.57

Universiti Malaya | Kuala Lumpur

August 2021 – May 2022

Foundation in Physical Sciences

- CGPA: 3.66, MUET: Band 4

Royal Military College | Sungai Besi

February 2019 – December 2020

- SPM: 5A+, 3A, 1B+

SKILLS AND LANGUAGES

Programming languages	:	Java, Python, JavaScript/TypeScript, C#, HTML/CSS, SQL, XML
Frontend	:	React.js, Next.js, Vue.js, React Native, Tailwind CSS
Backend & Tools	:	Node.js, Express, Flask, .NET, Prisma ORM, YAML
Mobile Development	:	Android Studio, Expo, Expo EAS
AI & Machine Learning	:	TensorFlow, YOLOv8
Deployment & Hosting	:	Vercel, Render
Cloud & DevOps	:	AWS S3, Google Cloud Platform (GCP), Firebase, Docker, Git, GitHub Actions, CI/CD
Databases	:	PostgreSQL, MongoDB, Oracle, Neon DB
Testing & QA	:	Manual Testing, Test Case Design, Equivalence Partitioning, GUI Testing, Unit Testing, Integration Testing, System Testing, Software Maintenance (Corrective, Adaptive, Perfective), Software Maintenance (Corrective, Adaptive, Perfective), Software Requirement Analysis (SRS)
Languages	:	English (Professional) , Malay (Native)

WORK EXPERIENCE

Software Engineer — Exact Asia

May 2026 – Present

Research Assistant — Universiti Malaya

February 2026 – May 2026

- Deploy Complete Drone4Dengue app and submit a research paper to a reputable conference/journal.

Intern — Forthify Technologies

March 2025 – December 2025

- Migrated a complete website framework from WordPress to Next.js, resulting in a 20% reduction in page load times and significantly lower maintenance overhead.
- Developed and deployed Imaginur, a comprehensive image compression web application using .NET backend and HTML frontend.
- Involved in Frontend development of an AI Chatbot project.

Intern Full-Stack Web Developer — A Serious AI Sdn Bhd

July 2024 – December 2024

- Developing an Enterprise Resource Planning (ERP) project named SuDUAI using Vue.js, TypeScript, Node.js, Express, Prisma ORM and PostgreSQL.
- Collaborated in agile Development environment, participating in sprint planning, retrospectives, and daily stand-ups to ensure timely delivery of tasks.

- Implementing AWS S3 for file management and integrating third-party SQL systems to ensure 100% data synchronization across modules.

PROJECTS

Final Year Project — Drone4Dengue Admin Web & DengueEye Mobile App ***March 2025 – February 2026***

- Designed and implemented an AI-powered system that integrates drone imagery, machine learning, and meteorological data to detect mosquito breeding sites and forecast dengue outbreak risks with over 80% prediction accuracy.
- Built a cross-platform solution using NextJs, NodeJs, Python, Firebase, TensorFlow, and React Native, featuring automated image analysis and real-time risk mapping for public health monitoring.
- Integrated tools such as Flask, YOLOv8, Firebase Storage, and GeoCode API, enabling seamless data visualization and cloud-based drone image management.
- Developed 168 test cases for 25 application features using Equivalence Partitioning and GUI Testing, and implemented unit, integration, and system testing to ensure functional accuracy and cross-platform accuracy.

Company Project — SuduAI Enterprise Resource Planning (ERP) Solutions ***July 2024 - Dec 2024***

- Contributed to the development of an Enterprise Resource Planning (ERP) system named SuDUAL, leveraging Vue.js, TypeScript, Node.js, Express, Prisma ORM, and PostgreSQL to build a robust and scalable platform.
- Implemented AWS S3 bucket services for file storage and retrieval across 12 modules, enhancing data management efficiency.
- Worked on integrating third-party SQL systems (SQL Financial Accounting) to ensure seamless data synchronization and optimized system performance.

CERTIFICATION

-
- ***AWS-COA - Cloud Operations on AWS*** ***September 2024***

EXTRACURRICULAR

PSU-UM COM SCI Reciprocal Mobility Program, Hatyai ***November 2025***

- Participant, International Student Exchange Program

Research Mobility Network, UNRAM Lombok ***September 2025***

- Participant, International Student Exchange Program

SUSTAINABLE ENERGY AND GREEN TECHNOLOGY APPLICATIONS, (SEGTA) ***August 2025***

- Participant, International Student Exchange Program

GLOBE@UM Program ***June 2025***

- Committee & Facilitator, Student Exchange Program

Programming League National UM ***January 2025***

- Logistic Committee, competition

UM to UI (Universitas Indonesia) Short Course on Sustainable IT 2024 ***May 2024***

- Logistic Committee, competition

Faculty of Computer Science and Information Technology Dean's Cup ***December 2023***

- Contest Protocol Committee, competition

ACHIEVEMENTS

-
- Dean's List award in Semester 4, 6 & 7
 - Preliminary Round in PayHack 2025
 - Preliminary Round in UMHackathon 2025
 - Shortlisted for IPT Category in Rapid Bus X UTM Data Hackathon 2023
