

ADAM BIN ARBAIN

Kerinci, Kuala Lumpur | adamarbain2107@gmail.com | +60104587140
<https://www.linkedin.com/in/adam-arbain/> | <https://www.adamarbain.dev/>

Software Engineering Graduate from Universiti Malaya with over 12 months of hands-on internship experience in full-stack development and production system maintenance. Proven expertise in migrating legacy frameworks to Next.js, developing AI-integrated systems, and building scalable ERP solutions. Leveraging technical proficiency in Java, JavaScript, Node.js, and Python to deliver impactful, innovative software solutions.

EDUCATION

Universiti Malaya Kuala Lumpur Bachelor of Computer Science (Software Engineering) • CGPA: 3.54	October 2022 – February 2026
Universiti Malaya Kuala Lumpur Foundation in Physical Sciences • CGPA: 3.66, MUET: Band 4	August 2021 – May 2022
Royal Military College Sungai Besi • SPM: 5A+, 3A, 1B+	February 2019 – December 2020

SKILLS AND LANGUAGES

Programming languages	: Java, Python, JavaScript/TypeScript, C#, HTML/CSS, SQL, XML
Frontend	: React.js, Next.js, Vue.js, React Native, Tailwind CSS
Backend & Tools	: Node.js, Express, Flask, .NET, Prisma ORM, YAML
Mobile Development	: Android Studio, Expo, Expo EAS
AI & Machine Learning	: TensorFlow, YOLOv8
Deployment & Hosting	: Vercel, Render
Cloud & DevOps	: AWS S3, Google Cloud Platform (GCP), Firebase, Docker, Git, GitHub Actions, CI/CD
Databases	: PostgreSQL, MongoDB, Oracle, DBeaver, Neon DB
Certifications	: CCNAv7 NetaCAD (Cisco), Software Testing & Modeling
Languages	: English (Professional) , Malay (Native)

WORK EXPERIENCE

Intern — Forthify Technologies	March 2025 – December 2025
• Migrated a complete website framework from WordPress to Next.js, resulting in a 20% reduction in page load times and significantly lower maintenance overhead. • Developed and deployed Imaginur, a comprehensive image compression web application using .NET backend and HTML frontend. • Involved in Frontend development of an AI Chatbot project.	
Intern Full-Stack Web Developer — A Serious AI Sdn Bhd	July 2024 – December 2024
• Developing an Enterprise Resource Planning (ERP) project named SuDUAI using Vue.js, TypeScript, Node.js, Express, Prisma ORM and PostgreSQL. • Collaborated in agile Development environment, participating in sprint planning, retrospectives, and daily stand-ups to ensure timely delivery of tasks. • Implementing AWS S3 for file management and integrating third-party SQL systems to ensure 100% data synchronization across modules.	

PROJECTS

Final Year Project — Drone4Dengue Admin Web & DengueEye Mobile App	March 2025 – February 2026
- Designed and implemented an AI-powered system that integrates drone imagery, machine learning, and meteorological data to detect mosquito breeding sites and forecast dengue outbreak risks with over 80% prediction accuracy. - Built a cross-platform solution using NextJs, NodeJs, Python, Firebase, TensorFlow, and React Native, featuring automated image analysis and real-time risk mapping for public health monitoring. - Integrated tools such as Flask, YOLOv8, Firebase Storage, and GeoCode API, enabling seamless data visualization and cloud-based drone image management.	
Company Project — SuduAI Enterprise Resource Planning (ERP) Solutions	July 2024 - Dec 2024
- Contributed to the development of an Enterprise Resource Planning (ERP) system named SuDUAL, leveraging Vue.js, TypeScript, Node.js, Express, Prisma ORM, and PostgreSQL to build a robust and scalable platform. - Implemented AWS S3 bucket services for file storage and retrieval across 12 modules, enhancing data management efficiency. - Worked on integrating third-party SQL systems (SQL Financial Accounting) to ensure seamless data synchronization and optimized system performance.	
Course Project — Virtual Development of JOJOLANDS	April 2023 – June 2023
- Collaborated in a team to design and implement "JOJOLands," a complex virtual environment modeled as a sub-tropical island using advanced data structures. - Used Java, HashMaps, ArrayLists, LinkedLists, Graphs (Adjacency Lists), JSON for data handling and storage.	

EXTRACURRICULAR

PSU-UM COM SCI Reciprocal Mobility Program, Hatyai	November 2025
Participant, International Student Exchange Program	
Research Mobility Network, UNRAM Lombok	September 2025
Participant, International Student Exchange Program	
SUSTAINABLE ENERGY AND GREEN TECHNOLOGY APPLICATIONS, (SEGTA)	August 2025
Participant, International Student Exchange Program	
GLOBE@UM Program	June 2025
Committee & Facilitator, Student Exchange Program	
Programming League National UM	January 2025
Logistic Committee, competition	
UM to UI (Universitas Indonesia) Short Course on Sustainable IT 2024	May 2024
Logistic Committee, competition	
Faculty of Computer Science and Information Technology Dean's Cup	December 2023
Contest Protocol Committee, competition	

ACHIEVEMENTS

- Dean's List award in Semester 4 & 6 - Preliminary Round in PayHack 2025 - Preliminary Round in UMHackathon 2025 - Shortlisted for IPT Category in Rapid Bus X UTM Data Hackathon 2023
